Ulrichsweb

Ulrichsweb is a directory of periodicals in all subject areas. The periodicals include peer-reviewed journals, trade journals, popular magazines and more. The directory can help the researcher identify journals in a broad subject area. It identifies refereed publications and lists databases that index a particular journal.

The directions below guide you through a search of Ulrichsweb at the UNT Libraries.

1. Start at the UNT Libraries homepage at www.library.unt.edu

2. Locate the large blue search box and conduct a Database search for [ulrichsweb].

3. Connect to Ulrichsweb using the link midscreen. If you are off-campus, you will be asked to enter your EUID and password after you select the link.

4. When Ulrichsweb opens, select the Advanced Search.

5. Change the dropdown menu to Subject (Keyword) search and add 2 to 3 words that describe your general research area.
6. Select limiters to narrow the results. Additional ones you may want to use are Key Feature - Refereed/Peer-reviewed and Subject Area.

7. Finally, click on the Search button on the bottom right of the search screen.

8. The results come up in relevance order. You can narrow your search further using the facets on the left. The icon of a referee’s jacket means the journal is refereed (you actually have to visit the journal site to find out if it is peer-reviewed or editor-reviewed). Electronic versions of journals are indicated with an “e”. Select a journal title to get more details.

9. The screen of journal details defaults to the Basic Description. Click on the other sections to open the details.
10. The Abstracting and Indexing section tells you where other researchers are able to discover articles in this journal.

- EBSCOhost
  - Current Abstracts, 4/1/2007-
  - Education Research Complete, 10/1/2006-
  - Education Research Index, Oct.2006-
  - Education Source, 10/1/2006-
  - TOC Premier (Table of Contents), 4/1/2007-

11. The Subject Classifications section shows the subject keywords that your search found.

<table>
<thead>
<tr>
<th>Subject Classifications</th>
</tr>
